

ALABAMA JUNE INDUCTION QUOTA IS 275

State Director Hugh J. Caldwell, Jr., today announced an Alabama June induction call for 275 men. "In order to reach this goal," Caldwell said, "it

4 to 1 for METCALF

In his hometown of Hartford, where the people know him best, Neil Metcalf got 4 to 1 votes over the entire field of his opponents on May 5.

THAT SAYS
A LOT FOR
AMAN

VOTE NEIL METCALF JUNE 2 FOR STATE SENATOR

(Pd. Pol. Adv. by Hartford Friends of Neil Metcalf)

will be necessary to call 495 men to the Armed Forces Entrance and Examining Station."

Alabama's 495 selectees will go toward satisfying a June national call for 15,000 men - the same as for May. June's call will include delinquents, those with relatively low random sequence numbers, and registrants who had been temporarily postponed, and whose postponement had expired. The over-call of 495 registrants to obtain 275 inductees is caused by the fact that many of those called will fail the final entrance examination, or will have enlisted in a service branch prior to induction.

Some married men will be included in the June call, Caldwell said, which is to be made up of registrants 19 years of age and older, in Class I-A and I-A-O, examined and acceptable.

Caldwell also issued a reminder that graduating college seniors this spring will receive no new occupational deferment from the draft unless the deferment was requested prior to April 23, 1970.

President Nixon, on April 23, issued an executive order which permits no new occupational deferments unless the deferment is in the national interest and was made prior to April 23. This order will affect graduating seniors from entering teaching careers until they have completed their military obligations, Caldwell said. Coffee County will induct two men in the June call.

To help keep poultry houses cool in the summer, whitewash or paint the roof white to reflect the heat. This reduces the inside temperature seven or eight degrees.

Chris Boswell To Marry June 19

Miss Christine Boswell

The engagement and forthcoming marriage of Christine Boswell to B. Franklin Lowry, son of Mr. and Mrs. B. P. Lowry, and Mrs. B. P. Lowry, is announced by her parents, Mr. and Mrs. Johnnie Boswell, Elba, Alabama.

The bride-to-be is the granddaughter of Mr. and

Mrs. John Boswell and Mr. and Mrs. Frank Johnson, all of Elba.

The groom-to-be is the grandson of Mr. and Mrs. E. A. (Pad) Lowry and Mr. and Mrs. Charlie Tindol, all of Jack, Alabama.

Formal invitations have not been issued but all friends and relatives of the couple are invited to attend the wedding and reception to be held at the home of the bride Friday, June 19, at 6:30 in the evening.

Your vote has never been so important!

You must decide who is best qualified to speak for you, to represent your interests, and to fight your battles.

George Wallace's accomplishments for you and his program for the 70's are vastly superior to his opponent's.

George Wallace is still fighting for you.

He has refused to give in to the out-of-state forces interfering in your election.

He has not given in to the 250,000 black bloc votes delivered to his opponent.

They will be out again in record numbers on June 2. If your voice is to be heard in Montgomery for the next four years, you must make sure your friends, relatives and neighbors get out and vote.

Stand up for Alabama.

Jus' Ramblin' BY LUCILE K. WOODHAM MCRAE

"The Big Board" will again be "in session" next Tuesday night on the square in Elba following the election. The "Big Board" will be used to give

THE ELBA CLIPPER

PUBLISHED WEEKLY ON THURSDAYS

A. T. MCRAE PUBLISHER
JOHN FERRIN COX EDITOR

ENTERED AT THE POST OFFICE IN ELBA, ALABAMA, 38223 AS SECOND CLASS MATTER UNDER THE ACT OF CONGRESS, MARCH 3, 1879.

ALABAMA JUNIOR COLLEGES

ARE OPERATED BY THE STATE BOARD OF EDUCATION...

I. B. STONE

Pledges to work for continued growth of our junior colleges to offer college education to thousands who could not afford it otherwise.

I. B. STONE

STATE BOARD OF EDUCATION
(P.D. Pol. Adv. by I. B. Stone, Rt. 2, Box 254, Alexander City, Alabama)

the election returns as usual in front of the Jewel Box, the usual set-up for presenting the election returns. Actually that "Big Board" creates as much interest as the election and hundreds of people gather there following an election. It is like going to a big party and every body has a good time except a losing candidate, probably. Even they enjoy the crowds because all candidates have friends in that bunch.

It will again be an exciting time in Elba next Tuesday night when election returns will be posted on the "Big Board", on the square. Be there and enjoy it with the rest of us. GEORGE WALLACE continues to be "very silent about

his 'black bloc' vote in '58 in front of the Jewel Box, the usual set-up for presenting the election returns. Actually that "Big Board" creates as much interest as the election and hundreds of people gather there following an election. It is like going to a big party and every body has a good time except a losing candidate, probably. Even they enjoy the crowds because all candidates have friends in that bunch.

The black people voted for four of the candidates, namely George Wallace, Albert Brewer, Charles Woods and Jim Folsom. If Albert Brewer had received the entire black vote there would not be a run-off election for governor.

But misrepresenting things is no reason to be surprised about this attempt to frighten the people. I'm not sure but that he has traded for the "black vote" as he calls it.

So long as white people scream about voting the same way as the black people, we will continue to have "black bloc" because the white people themselves are "black bloc" when that happens. It would then continue to be either "black bloc voting" or "white bloc voting" and neither would be intelligent voting. It would actually be war between the races and that should never be.

The Wallace forces wanted that bloc vote and if they can get them June 2nd you can bet they will not tell the bloc vote to get lost.

George Wallace claims that he is not allowing "race" to enter his campaign but his every breath is spouting race between the races.

I AM NOT so much for Albert Brewer for governor as I am against George Wallace for governor. After Albert Brewer did become governor and Alabama became so peaceful and quiet I then began to look at Albert Brewer in a different light. He had six and one-half years of constant bickering and friction with the state most of the time before the rest of the nation. Many of us were happy that we at last had a calm and effective governor. He has proven himself to be a good business man as well as able to keep peace in the state most of the time. That has been a welcome change.

Another thing I like about Albert Brewer is the fact that he has been getting the jobs done that George Wallace promised but did nothing about. He had six and one-half years in the governor's office, yet he did not fulfill a single promise he made.

DID YOU KNOW are you concerned - that four out of every five dollars owed by the State of Alabama without a vote of the people as had always been the case.

Did you know that it takes a total of \$44 million a year to pay the interest and service the Wallace debt, \$44 million in interest, alone, that amount does not include anything paid on the principle.

Did you know that Alabama had an outstanding debt of \$551,000,000 as a result of the Wallace administrations, an increase of \$473,000,000 made by George Wallace?

And do you really know the big increase that was made in taxes during the Wallace administrations? I call your attention to an advertisement in this issue of this newspaper giving you the break-down and amount of tax increase made by George Wallace.

If you're against taxes you can't possibly vote for George Wallace and his future. He would have done well to have married her earlier if she would have served.

George Wallace is much older than this young lady, in fact he is older than I am. I saw her grow up after he was in the Alabama legislature.

THIS TIME next week we will know who will be making the trip to Buck's Pocket. It is my opinion that Albert Brewer will be elected. Some reports are that it will be by a margin of 45 to 50 thousand votes but I can't see it that way. I think it will be close but not as close as the results of the first primary.

Anyway, I'll be ready to make the trip to Buck's Pocket if Albert Brewer should be defeated.

ON THE SQUARE IN ELBA

Re-Enactment To Be Held Of The Battle Of Horseshoe Bend

History will come alive in exciting splendor for six nights in May and June when Alabama and tourists from all parts of the United States converge on Wind Creek Park for the re-enactment of the Battle of Horseshoe Bend.

It is this historic battle, and the events leading to it that are revealed in "The Day the River Ran Red", to be presented on May 29-30 and 31 and June 5-6 and 7, at 8 o'clock each evening.

Wind Creek Park, site of the drama, is located on Highway 63, five miles south of Alexander City, Alabama, and is located on the park by Highway 280 northwest of Dadeville. Routes to the performance will be adequately marked.

Script for the production was written by George Elia of the Rogers Company of Portora, Ohio, producers of outdoor dramas for many years. Directing this year will be Jim Hayes, who studied as a child at Cleveland Children's Theater and later at Pasadena Playhouse.

The cast for "The Day the River Ran Red" calls for some 250 actors, many of whom will be making their second appearance in the drama. Tickets may be

CARD OF THANKS

We wish to extend our deep appreciation for every kindness extended during the illness and death of our loved one. Each prayer and every act of kindness is acknowledged with gratitude.

THE FAMILY OF MARGUERITE HORNSBY, future of our nation and unnecessary.

WORTH REPEATING

"Our society and system in the United States have become so complex that all parts are dependent on each other. To continue to fragment various groups into polarized positions can only add to the grave schemes that are developing. One of the areas of developing polarization is the issue of consumerism. Steps are occurring to place manufacturers on the defensive in one group, and allegedly flim-flammed and confused consumers in the other group. I think this is dangerous to the future of our nation and unnecessary."

—John Phillips, President, R. J. Reynolds Foods, Inc.

Washington Report

by **GEORGE ANDREWS**
Member of Congress
Third District of Ala.

Smug merchants who flood the mails with obscene advertisements are major contributors to moral pollution, just as other filth pollutes our air and rivers.

Action against these people has been long in coming, but the House of Representatives recently passed legislation, which I co-sponsored, that excludes from the mails certain material offered for sale to minors and protects the public from the intrusion into their homes of sexually oriented mail matter.

One important part of the multi-million-dollar pornography business has been bold advertisement of its wares through unsolicited mass mailings. It is of little concern to the people who peddle this filth that their envelopes, revealing nothing of their contents, will fall into the hands of unsuspecting

(Job 22:29 A.V.)

Many of us have gone through the experience of being disappointed when our confidence in our ability has been shaken through non-achievement of a hoped-for result or goal. Then and there we should reassert our faith in the power of God within us. We should reaffirm our belief that with God we are able to do all things. There is the divine self in us, the Christ self, that is always capable, always one with the Mind of God encouraging us to succeed.

minors' on a New York State statute already upheld by the High Court.

"Harmful to minors" in this bill means that the material predominantly appeals to the prurient interest of minors; is offensive to prevailing standards in the adult community concerning what is suitable material for minors; and is substantially without redeeming social value for minors.

A second purpose of the bill is to afford a much stronger measure of protection for the privacy of adults who do not want to receive sexually oriented advertising.

It permits any person to place his name as well as those of his children under 19 years of age who are in his care and custody on a list of those who do not want to receive such sexually oriented advertisements through the mails.

The list will be maintained and kept current by the Postmaster General, and it will be made avail-

able to mailers for a reasonable service charge.

Placing obscene material in the hands of curious adolescents can do untold damage and could lead to crime. FBI Director J. Edgar Hoover has stated that sex crimes and obscene and vulgar literature often go hand-in-hand.

"The time for half-hearted oblique actions against dealers in depravity is past," he said recently. "Although their despicable trade reaps \$500 mil-

lion a year, this diabolical business is costing the nation much more than money. It is robbing our country and particularly our younger generation of decency—it is a seedbed for delinquency among juveniles and depravity among all ages."

Director Hoover has sounded the call for action. We in the House of Representatives have responded. The battle against the deadliest pollution of all has begun.

The May 5 results show Joe and Bob were telling the truth about the black bloc vote!

QUOTES From
Alabama Democratic
Conference Chairman
Joe Reed's Letter Send-
ing Thanks For \$25,000
Contribution From
Washington!

"We can take the ballot and make politicians in Alabama behave."

"Another major priority will be to turn out 260,000 Negro voters with a goal of delivering 225,000 to the candidate we endorse."

"It goes without saying that the foregoing proposals outlined above should put the finishing touches on George Wallace's final retirement from public office in Alabama."

QUOTES From
Governor Albert
Brewer's Finance Di-
rector Bob Ingram In-
terview in Atlanta Jour-
nal—March 22, 1970

"We expect a million votes to be cast," Ingram said. "There's 225,000 Negro voters. You don't expect them to vote for George Wallace, do you? Albert will get 100,000 to 125,000 Republican votes. All he needs is a total of a little over half a million."

ALABAMA WILL ANSWER ON JUNE 2!

Whiskey and Good Government Don't Mix

Mr. Jere Beasley's only experience in government has been as a lawyer for the liquor board.

As. Lt. Governor, Mr. Beasley will be in a position to push through laws legalizing the sale of liquor in all 67 counties and permitting the sale of whiskey and beer to 18 year olds.

ALABAMA DOESN'T NEED A LIQUOR LAWYER AS LT. GOVERNOR

Elect A Man With Experience & Proven Integrity
DOUGLAS EASTER
AS YOUR
REPRESENTATIVE
FROM
Coffee County
ELBA, ALABAMA
May 28, 1970

Dear Friends

This letter is being written to better acquaint you with me as a citizen of Coffee County and with my particular qualifications to serve as your Representative.

I was born to a farming family in northwest Coffee County and later moved to Elba which has been my home since 1926. I was reared in Elba by my mother, Mrs. Eva Easters, and my late grandparents, Oscar Sawyer and Harriet Dyess Sawyer. My formal education was received in the Elba school system, the University of Alabama and the University of Maryland. I have engaged in special studies in the areas of government, management, training, finance and human relations.

Prior to World War II, I enlisted in the Army Air Corps and was commissioned during the war. By age 36 I had risen to the grade of Colonel and had served overseas in two wars. Eight years ago I retired from military service and returned to my home in Elba. Since retirement I have worked in banking, construction and now am in a real estate business of my own.

I have served as President of the Elba Chamber of Commerce, am a Mason, Rotarian and now serve on the Administrative Board of the Methodist Church.

In 1945 I married Martha Capps, daughter of Mr. and Mrs. W. M. (Bill) Capps of Enterprise. We have been blessed with two sons and a daughter who are receiving their education in school systems in this county and the State of Alabama. Our family has enjoyed the close association with our many relatives and friends throughout Coffee County for the past eight years.

As a parent, businessman and property owner in this county, I have a keen interest in the problems of education, business, labor, taxation and industrial development with their many associated problems.

When elected to serve in your legislature, I will work vigorously for the betterment of our county and state. I will visit with you frequently so that we may work together toward a common goal.

I solicit your vote and influence on June 2nd.

Sincerely yours,
Douglas Easters

Best Time For Fishing Is Told By Expert

No one wants to come home from a day of fishing empty-handed. Extension Wildlife Specialist Earl Kenamer says a study of 20 Alabama state lakes has uncovered information to insure success for the most inexperienced fisherman.

The study shows that the highest average catch, 224 pounds of fish per acre, was made the first year the lakes were opened to fishing. Also, the first week a pond is open to the public, heavy fishing pressure can remove up to 60 per cent of the total harvest of fish will be removed in a year's time.

Temperature plays a big part in fishing success, adds Kenamer. In one survey, 100 hours of fishing in water below 50 degrees Fahrenheit produced two fish. But the same time spent fishing in water above 50 degrees Fahrenheit produced two fish. But the 50 degrees Fahrenheit netted 40 fish.

To bring home the big ones this spring, Kenamer advises fishing in a new lake, early in the season when the water temperature is from 50 to 85 or 90 degrees Fahrenheit. Honeybees are invaluable in the pollination of many crops in Alabama, says Carl Dennis, Extension apiculturist. But growers don't always consider these pollinators when using insecticides. Damage caused by killing pollinators could be as great as the potential damage of harmful insects.

When insecticides are necessary, Dennis advises following recommended practices. If possible, apply insecticides before or after the crop blooms. Use insecticides least toxic to bees and in the smallest possible amount. Apply insecticides in late afternoon or at night when bees are not on the blooms. Use a spray instead of a dust. For applying the material, Dennis says ground equipment is safer than airplanes.

Try to avoid drift in insecticides to plants that bees like. Notify all beekeepers in the area to be treated so they can help protect their colonies. However, Dennis adds, notification of owners isn't a release from responsibility.

1040 U.S. Individual Taxpayers Ask IRS

This column of questions and answers on federal tax matters is provided by the local office of the U.S. Internal Revenue Service and is published as a public service to taxpayers. The column answers questions most frequently asked by taxpayers.

Q It's been just about a month since I sent in my tax return and my refund still hasn't come. Why should it take me so long to get my money back when fellows at the shop get their refunds in a month?

A) The date the return was filed has a lot to do with how long it takes to be processed. Returns filed early can be processed and any refund checks issued within 4-6 weeks from the date they were received by the IRS.

Q My daughter is eligible for a scholarship that will pay part of her college tuition. If she gets it will it be taxable for her? Also, will it affect the exemption I claim for her?

A) Income from scholarships is generally not taxable, and does not have to be included in parents' total support. Returns filed in April take longer to process because of the great number of tax returns that come into our service centers during this period.

Q Are tips taxable? I'm taking a job as a waitress in a summer resort and my girlfriend tells me that tips are very good there.

A) Yes, tips are counted as taxable income. If your tips amount to \$20 a month or more, they should also be reported to your employer so they can be credited.

Q Does everybody have to have clearance from IRS to leave the country?

A) No, U.S. citizens are not required to obtain tax clearance. However, many aliens are required to obtain this clearance from the IRS.

Q If I have savings bonds and put them in my son's name, who has to pay tax on the interest they earn?

A) If the bonds are issued solely in your son's name, or in his name with you as beneficiary, then the interest earned on the bonds will be income for your son.

Q If I buy savings bonds and put them in my son's name, who has to pay tax on the interest they earn?

A) If the bonds are issued solely in your son's name, or in his name with you as beneficiary, then the interest earned on the bonds will be income for your son.

Q If I have savings bonds and put them in my son's name, who has to pay tax on the interest they earn?

A) If the bonds are issued solely in your son's name, or in his name with you as beneficiary, then the interest earned on the bonds will be income for your son.

WE NEED FT. RUCKER

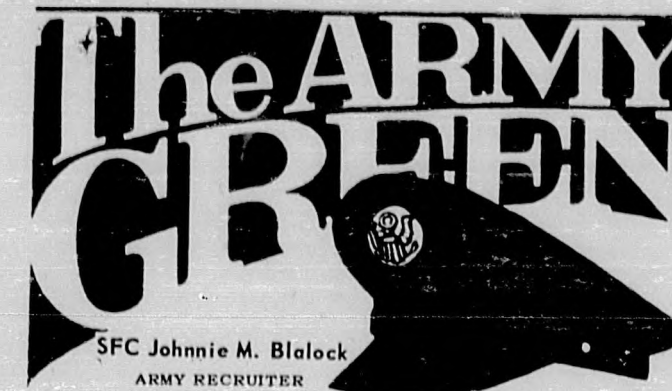

Fort Rucker is vital to the Wiregrass. 9,000 civilians work at Ft. Rucker. \$118 million in payroll is poured into this area every year. Ft. Rucker is absolutely essential if the Wiregrass is going to grow.

Not long ago, Brookley Field in Mobile was closed by the government. 18,000 civilians lost their jobs — without warning. The same thing could happen to Ft. Rucker unless our governor and our congressmen can work together to keep Ft. Rucker operating at full strength.

**DON'T LET IT HAPPEN HERE
ELECT ALBERT BREWER**

Citizens to save Ft. Rucker, George Dysart, Chairman, Enterprise, Ala.

If you ever happen to be strolling past a drill field and encounter a group of Revolutionary War troops, don't be alarmed. You haven't been transported back to colonial times. What you are probably seeing is the Fifth and Drum Corps, a part of one of the Army's oldest units, the Third Infantry (Old Guard). The Corps was organized in 1960 to provide music for Old Guard ceremonies. The colorful costumes worn by the members are exact reproductions of Revolutionary War uniforms, right down to the three-cornered hat. The numbers they play are taken from authentic music of that period. The Corps is noted for its use of the colonial drill was formulated by Baron Friedrich von Steuben, the Prussian officer who trained George Washington's troops.

The Old Guard Fifth and Drum Corps, in addition to its appearances on national television and at the local celebrations across the country, thrills thousands each year at the military pageants, "Preclude to Taps" and "Torchlight Tattoo" in the Washington, D. C., area.

ARMY HOBBYIST FLY HIGH
Are you the type that has your head in the clouds? Then you're perfect material for the Army Flyer Club, which are located at installations throughout the United States. Organized in 1957, the clubs provide soldiers who are private pilots or want to be, a place to indulge their hobby and something to do it with—airplanes. To date there are about 3,500 members in clubs, and they use 195 planes, which are on loan or are rented from the Army. Club members must foot the bill for fuel and upkeep. Hangar and office space is usually provided for the amateur pilots in the Army. Membership is open to all men and women in service.

Model aviation has progressed rapidly over the last quarter of a century. From gas engines for the early models, to the sophisticated radio control systems available today, aerospace technology, a bit about the opportunities which the Army offers you in the field of aviation mechanics. You can learn the ways and means of repairing aircraft engines. Or you can become an expert in the electronics, aircraft instrumentation repair or hydraulic systems repair. If you want further information about this field, drop into our office at 215

Political Announcements

FOR REPRESENTATIVE COFFEE COUNTY

I hereby announce my candidacy for the office of Representative from Coffee County, in the Alabama Legislature, subject to the action of the Democratic Primaries May 5 and June 2, 1970.

I'm indebted and dedicated to the people of Coffee County. I will represent all the people of Coffee County fairly and impartially. I stand for continued progress and industrial growth in a sound, conservative, business like manner.

I will try to see everyone in person, but realize it will probably be impossible. I take this method of asking for and voicing my appreciation for your vote and support.

I want to be YOUR Representative.

G. C. (Don) Donaldson, Jr. (pd. pol. adv. by Don Donaldson, Enterprise, Ala.)

FOR PROBATE JUDGE COFFEE COUNTY

I wish to announce my candidacy for election as Judge of Probate of Coffee County and respectfully ask for your support and influence in my behalf.

I am not against anyone. I am not obligated to any group. I promise to serve this county to the very best of my ability.

I will make an effort to see each voter in Coffee County between now and election day but I realize I will miss some of you. I earnestly solicit your vote and influence and any help will be appreciated.

Kimmie Dorsey Elba, Alabama (pd. pol. adv. by Kimmie Dorsey, Elba, Alabama).

FOR JUDGE OF PROBATE COFFEE COUNTY

Your vote and support is respectfully asked in my candidacy for Probate Judge of Coffee County, subject to the Democratic Primaries of May 5th and June 2nd.

I promise to serve this county to the very best of my ability. I will make every effort to see each voter in the county between now and election day.

I earnestly solicit your vote and influence in my behalf for election to this office.

James Sawyer Enterprise, Alabama (pd. pol. adv. by James Sawyer, Enterprise, Ala.).

FOR SHERIFF COFFEE COUNTY

I hereby announce my candidacy for Sheriff of Coffee County subject to the action of the Democratic Primary election to be held May 5th and June 2nd, 1970.

If I am elected your sheriff, I promise to serve the people of Coffee County to the very best of my ability.

It is my sincere hope to see as many of the voters of Coffee County as possible prior to election day.

I earnestly solicit your vote and influence in my behalf.

Your vote and support is earnestly solicited and will be highly appreciated.

Charlie G. Webb Enterprise, Alabama (pd. pol. adv. by Charlie G. Webb, Enterprise, Ala.).

ASC Committee Ready For Questions

FOR REPRESENTATIVE 41ST DISTRICT COFFEE COUNTY

I hereby announce that I am a candidate for nomination in the Democratic Primaries as a member of the Alabama House of Representatives, 41st District, Coffee County.

If elected, I promise to keep in close touch with the people of the county and to work for the benefit of the District and of the State of Alabama.

I pledge to support integrity in government, your views on issues, and not to take personal advantage of this office.

I will sincerely appreciate your vote and influence and I will make a special effort to see all the voters in the county prior to the election May 5th.

I want to be YOUR Representative.

G. C. (Don) Donaldson, Jr. (pd. pol. adv. by Don Donaldson, Enterprise, Ala.)

FOR SHERIFF COFFEE COUNTY

I wish to announce my candidacy for Sheriff of Coffee County, subject to the Democratic Primary election May 5, 1970.

If I am elected your sheriff, I promise to serve the people of Coffee County as a whole and to the very best of my ability.

I have 26 years of law enforcement experience and am qualified to fill this most important office.

I earnestly solicit your vote and influence in my behalf for election to this office.

Ralph Sparks Enterprise, Alabama (pd. pol. adv. by Ralph Sparks, Enterprise, Ala.).

Opp Trade School To Graduate 131 June 26th

MacArthur State Technical Institute, Opp, Alabama, will graduate 131 persons from fourteen departments on June 26. This will be their largest graduation since their opening in 1963. Nineteen candidates are scheduled to graduate from Business Education; six, Data Processing; twenty-seven, Cosmetology; twenty-three, Practical Nursing; one, Barbering; six, Diesel and Heavy Equipment Mechanics; five, Auto Body Repair; four, Automotive Mechanics; eight, Air Conditioning and Refrigeration; four, Electronics; one, Upholstery; eight, Radio and Television; six, Industrial Electricity; and thirteen, Welding.

Approximately twenty-five students are to receive Certificates of Proficiency in Related Communication Skills and fifteen in Related Mathematics.

Of these 131 students who have already completed their courses or will complete them by June 26, only twenty-six persons are known to be unemployed and available for jobs.

Scores of other persons have attended MacArthur Tech for a relatively short period of time, receiving sufficient skill to enable them to be employed in the field for which they were in training, but who were not enrolled for the prescribed period necessary for graduation.

An example of this, Shumack notes, might be the area immediately outside doors and windows. These areas may provide year-round interest that changes seasonally. A living room color scheme may be enhanced by a small tree that produces flowers, foliage or fruit that repeats, compliments or harmonizes with interior colors.

Such imagination, says Shumack, will produce that one thing that will make your yard different, more exciting and more beautiful than others.

Imagination Needed In Landscaping

Everyone wants a beautiful yard, says Extension Ornamental Floriculturist Ronald Shumack. And the key to an effective landscape is imagination.

Too often the landscape of the home grounds is considered a separate development from the interior of the house, adds Shumack. But, the most pleasing landscapes are those that are planned from the inside to the outside of the house.

An example of this, Shumack notes, might be the area immediately outside doors and windows. These areas may provide year-round interest that changes seasonally. A living room color scheme may be enhanced by a small tree that produces flowers, foliage or fruit that repeats, compliments or harmonizes with interior colors.

Such imagination, says Shumack, will produce that one thing that will make your yard different, more exciting and more beautiful than others.

A MAN WHO HAS PROVED HIMSELF TO THE PEOPLE, A MAN OF ACTION WHO GETS THINGS DONE... THAT'S NEIL METCALF

ALABAMA NEEDS TRADE SCHOOLS AND COLLEGES FOR BOYS AND GIRLS. I AM BACKING THIS PROGRAM ALL THE WAY.

NEIL METCALF DID SOMETHINGS ABOUT THIS NEED. HE SERVED IN AVIATION CAPACITY IN THE JUNIOR COLLEGE AND TRADE SCHOOL PROGRAM. HE WAS RESPONSIBLE FOR THE FIRST TRADE SCHOOL AT DAVENPORT PRISON FOR FIRST OFFENDERS.

NEIL METCALF HAS DONE A LOT FOR US. LET'S SEND HIM BACK TO THE STATE SENATE TO LOOK AFTER THE PEOPLE'S INTEREST.

HE'S CERTAINLY PROVED HIS WORD IS GOOD. HE DESERVES A SECOND TERM.

NEIL METCALF DUSHED LEGISLATION TO RECOGNIZE THE PEANUT AS AN INDUSTRY AND IN PROTECTION OF ALABAMA FARMERS.

NEIL METCALF WAS RETURNED TO THE STATE SENATE BY HIS DISTRICT FOR A SECOND TERM.

TO APPRECIATE HIM AS A DYNAMIC LEADER AND MAN OF ACTION WE LOOK TO HIS BACKGROUND. HE WAS BORN IN HARTFORD, GENEVA COUNTY, SON OF A FARM PRODUCTS BUSINESS.

AS A BOY HE WORKED ON THE FARM. HE WAS GRADUATED FROM GENEVA SCHOOLS WITH HONORS AND ENTERED THE UNIVERSITY OF ALABAMA.

HE FINISHED THE UNIVERSITY OF ALABAMA LAW SCHOOL AFTER THE WAR.

WE ARE CONCERNED. WE MUST RIGHT WHAT IS WRONG IN MONTGOMERY. OUR STATE CAN NOT GO FORWARD BOGGED DOWN IN CORRUPTION. I'LL REPRESENT YOU, THE PEOPLE... NOT THE POLITICIANS.

NEIL METCALF IS ASKING THE VOTERS OF THE 22ND DISTRICT TO ELECT HIM THEIR STATE SENATOR. HE LED THE PRIMARY BECAUSE THE PEOPLE KNOW HIS WORD IS GOOD. HE IS A MAN THE PEOPLE KNOW, LIKE AND RESPECT.

HE OPENED HIS LAW OFFICES IN GENEVA.

THIS METCALF IS A REAL GO-GETTER. HE IS IN BUSINESS WITH FESS PARKER WHO PLAYS DANIEL BOONE ON TV. THEY'RE OLD FRIENDS.

THAT METCALF IS A SCRAPPER ALL THE WAY. I LIKE HIM BECAUSE HE'S A CLEAR THINKER AND A STRAIGHT MAN.

HE GETS MY VOTE. HE MEANS WHAT HE SAYS.

NEIL METCALF IS A SCRAPPER ALL THE WAY. I LIKE HIM BECAUSE HE'S A CLEAR THINKER AND A STRAIGHT MAN.

Albert Armstrong, she is a 1970 graduate of Zion Chapel High School. The groom-to-be is the grandson of Mr. and Mrs. L. W. Bullard of Elba and Mrs. Lucille Sauls and the late Mr. Clinton Sauls of Thomaston, Georgia. A 1970 graduate of Zion Chapel High School he is presently employed in Georgia. The wedding will take place June 5 at 6:00 p. m. in the home of Mr. and Mrs. L. W. Bullard. All friends and relatives are invited to attend. Following the wedding, the couple will make their home in Atlanta.

Coffee County History To Be Published

In the typical frontier condition that existed in Coffee County in the 1840's and the 1850's living was very crude. Most of the early settlers settled in the flat land near the rivers. A major portion of Coffee County at that time was covered in pines, and became known as "the pine woods." The early pioneer felt that the river land would be more productive. This was a mistake for the land was poor and, no particularly suited to the cultivation of cotton. Since most of the settlers were from Georgia and the Carolinas, cotton was probably the crop from which they had planned to gain their livelihood in their new home. The people were poor, without the slave labor thought to be so necessary for a successful cotton plantation. For this reason the early farmers quickly turned their attention to livestock. Hogs and cattle were raised not only for home use but they soon became the chief source of income. Farms were small, the average size farm in 1859 being only sixty-nine acres.

In clearing their farms the settlers had made only a dent in the forests. Homes were set in small clearings. Within these clearings were also corn cribs, lean to's for the farm animals, and sometimes houses for those who had slaves.

Most of the houses were constructed of logs with hand hewn boards used as shingles for a roof. Often mud was used to fill the cracks between the logs. Glass windows were rare, and most of the houses only had wooden shutters opened to the outside. The chimneys were often made of mud latched with sticks which sometimes would catch fire.

Most of the furnishings of the house were as crude as the houses. Most of the furniture was home-made of rough materials. A bed would be made in a corner of a room with the wall forming three of the bed posts. Ropes were used to bottom chairs which were home-made and pegged together. Benches were provided extensively for the children to use at the table. Cooking on the open hearth was still prevalent in the 1840's and 1850's, but stoves were beginning to be used in the latter decade.

The pioneer woman, of necessity, was a hard worker. Her cooking was done over an open fire. For her washing she must either draw water from a well or take her wash to the spring. She must prepare cotton or wool, dip it and spin it into thread and weave at a clumsy home-made loom. She had to work in the garden, gather vegetables, care for the chickens, milk the cow, churn the butter and keep the milk and the butter in the spring or well. She must also do all the sewing for the family by hand and all this in addition to caring for the children. The only break in the monotonous routine of pioneer life were the trips to the old grist mill where news might be exchanged and yarns swapped, corn husked for the family by hand and all this in addition to caring for the children. The only break in the monotonous routine of pioneer life were the trips to the old grist mill where news might be exchanged and yarns swapped, corn husked for the family by hand and all this in addition to caring for the children.

ings, candy pullings, log rollings, and camp meetings on those rare occasions when a preacher was available.

The spinning wheel and loom occupied an important place in the home. The women made practically all of the clothes for the entire family. These are just a few of the burdens the pioneer women bore.

The people bought very little food for they raised most of what was needed. Coffee and salt were two of the things which it was necessary to import. The farmers swine, cattle and chickens furnished the family with meat and could be supplemented by wild game which was plentiful. Vegetables of almost any kind flourished and the winters were so mild that some things would grow the year round.

There was not very much in the way of recreation to occupy the people's leisure time. For the men there were hunting and fishing. Shooting matches were a common occurrence with turkeys or other prizes given to the winner. Great desires too often restricted to loitering in villages or around the stoves of country stores.

When a farmer had work to do which required outside labor he would ask his neighbors for help. Life was more monotonous for the women than the men for they had more work to do, and were tied more closely at home. If they had neighbors close enough, visits were exchanged, and they would converse while they sewed or knitted or quilted.

On Saturdays, there was shopping to be done, and often the whole family made the trip to town. The young people found relaxation in giving parties. Sometimes they would have candy drawings or some other combination of work and pleasure. Local fiddlers furnished music for square dancing which was engaged in by both the young and old. Life was crude, but the people seemed to have been satisfied to continue living in their own narrow orbit.

The people were not prepared for the shock of war or for the sacrifices that came with war. They wished to be let alone, and could see nothing in their way of life for others to object to or wish to change.

Thousands of years ago primitive man probably wrapped some meat in green leaves to keep it clean—or perhaps to keep it from drying out. In any event, this original packaging might have sparked the first seasoning of food since the leaves could have given a new flavor to the meat.

Nowadays, there was her salt knows that seasoning often the whole family made is essential to make food more appetizing. In fact, it's been said that food without seasoning is like talk without reasoning. Imagine how dull life would be if those 3,000 taste buds on your tongue couldn't detect sweet, sour, salty or bitter flavors.

Custom-Made Town Builds-In Safety

A new town for 75,000 people being built on 12,000 acres of open farmland has incorporated the best new ideas in traffic control. Litchfield Park, Arizona has arterial roads which are limited access parkways, fenced off and landscaped. There are no pedestrians, roadside stores, homes, driveways, or parked cars to interfere with the flow of traffic. Very few traffic lights are needed.

HIGH BEEF PRICES ARE EXPLAINED

Why does steak at the meat counter have such a high price tag?

A Consumer Education Specialist Miss Dorothy Overby says there are several reasons. A basic one is that Americans enjoy eating meat—especially beef—and they have the money to buy it.

In 1968 we consumed a record average of 182.5 pounds of meat per person, and it was estimated that the 1969 figure would come within a pound of that amount.

Miss Overby says beef consumption is at a new high of 10.5 pounds per person, pork next at 6.4 pounds, lamb a little more than three pounds and veal

Forty percent of American women work outside the home. So, with more money to spend and less time for preparation, American homemakers have been serving more meals containing meat and have been buying more steaks and chops, explains the specialist.

Today's meat is an improved product—with more protein, less fat, fewer calories, greater convenience and year-round availability, notes Miss Overby. These extras cost more money in research and development, packaging, processing and transportation.

She adds that consumers should accept the fact that it is doubtful that meat prices will ever reach previous low levels. If income from livestock continues below the level of the rest of the economy, many producers will be forced to go into some other business—meaning less meat at definitely higher prices.

POOR ORIGINAL

COFFEE NEWS & CHAT

BY: SARA HUTCHISON

A homemaker called and wanted to know how to clean pine paneling. Perhaps you would like to know also. Paneling may be cleaned with the following: one quart warm water, one tablespoon turpentine and one tablespoon olive oil. Mix these in a jar and shake well.

Soak a clean cloth in this, wring out and rub paneling briskly until clean. This will also clean old soil and wax from furniture and will leave a waxlike finish. If all the mixture is not used, cap the jar, label and store in a safe place.

Lettuce is by far the most popular green for making salad. Its popularity is well deserved because of its refreshing, crisp texture and pleasing color. Good quality lettuce is fresh, crisp, clean, cool, and attractively green. Head lettuce is at its best flavor and texture when it is medium weight for its size. When cut in half, it should have plenty of air spaces between the leaf folds. Hard heads may be over mature and may have a bitter taste.

Lettuce is perishable and should be purchased in a quantity that will be used in a few days. After buying lettuce, refrigerate it as soon as possible. Keep it cold, but don't freeze.

For longer storage, don't soak lettuce or remove core. Just refrigerate or rinse, drain well and store in was paper or foil. For convenience and crisp salads, wash lettuce thoroughly, drain and wrap or put into a bag and place in the refrigerator. This will make the lettuce cool and crisp.

When preparing salad, lettuce will bruise less if the head is torn with the fingers rather than cut with a knife.

Iron poor blood not only affects man, but also axaleas.

This is what Extension Floriculturist Ronald Shumack says and I know this to be true. The first signs of iron deficiency appear as yellowing or chlorosis between veins, with the veins

YOUNG SLUGGER—For Big League dreams, send him off to bed in these comfy cotton knit pajamas that look like a real baseball uniform.

MIDDLE AGED AT 27?
In 1920 when the average life expectancy was 54, a person 27 had lived half his life. Now thanks to amazing scientific discoveries, the average life expectancy is over 68 years.

Medical science has also made advances which permit longer life of today to be a healthier, more pleasant one.

on the new or upper foliage of the plant. What happens is this. Iron deficiency results from iron in the soil becoming unavailable to the plant. Azaleas grow best in soils with a pH of five to six, or slightly acid. When the soil pH exceeds six or the level of phosphorus is excessive, the availability of iron to azaleas decreases rapidly.

Barefoot days are here again, and so are the days when barefoot children are

more vulnerable to cuts, splinters and sharp tools. Any cut can be painful, but the worst cut of all is one that becomes infected. An infection can do more than spoil a child's summer—it can affect his whole life. Any place in or around the house where workmen or the do-it-yourself carpenter has been repairing or building should be inspected for leftover nails, tacks, jagged bits of metal, splinters and sharp tools. Check any part of the home where sewing is done for pins, needles, scissors, razor blades or sharp bits of ornaments that may have been dropped on the floor. They could easily be picked up by little children. In the kitchen pick up broken china or glassware immediately with damp paper, thoroughly wash the

area to make sure no silverware has escaped. Clean kitchen knives and return them to the wall rack or drawer immediately after use. Feeder pig grade depends on both the breeding herd quality and the environment or management under which the pigs are raised. In 1969 per capita consumption of broilers was 35 pounds. By 1980 per capita consumption will exceed 60 pounds and is expected to surpass pork.
